

NEEV GUPTA

Austin, TX | neevgupta@utexas.edu | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

EDUCATION

The University of Texas at Austin

Bachelor of Science in Computer Science, Minor in Economics

Expected Graduation: May 2028

GPA: 3.72/4.00

Relevant Coursework: Computer Architecture, Data Structures & Algorithms, Linear Algebra, Discrete Mathematics, Multivariable Calculus

Awards: State Farm Hack Day: 2nd Overall, Best Use of AI (\$3,000) · Texas Convergent: Best Business (\$200) · AkashML: 4th Place

EXPERIENCE

The University of Texas at Austin: Trust Prism

AI Researcher

Dec 2025 – Present

Austin, TX

- Built a Python/OR-Tools generator producing controlled murder-mystery puzzles for a planned 1,000-participant human-AI trust study
- Designed a two-parameter difficulty model and 3 tiers controlling direct, indirect, positive, and negative clues
- Built a CP-SAT solver encoding 7 clue types with feasibility and uniqueness checks across 100+ generated scenarios
- Seed-keyed each world state, clue set, solution, and metadata for exact replay, capturing 50+ structured interaction signals per session

State Farm

Software Engineering Intern, AI/ML

Jun 2026 – Aug 2026

Remote

- Architected a Python evaluation platform for Sophia AI agents, cutting manual regression testing and saving 6–12 hrs/test cycle
- Evaluated agents across schema selection, semantic-layer generation, tool usage, and answer quality across 250 promoted business questions
- Automated 20+ quality dimensions through 348 tests, achieving 100% runtime and Cube-contract success with zero question-level failures

TRNDG / YahDig Labs

Software Engineering Intern (Part-time)

Feb 2026 – May 2026

Remote

- Engineered a Node.js/TypeScript TikTok analytics API with automated 12-hour refreshes, eliminating manual marketing data pulls
- Built fault-tolerant snapshot infrastructure with cached state preservation, preventing scraper failures from disrupting downstream analytics
- Shipped 10 React Native trading interfaces across onboarding, discovery, and market views with haptic-driven interactions

H-E-B Digital

Software Engineering Intern

Jun 2025 – Aug 2025

Austin, TX

- Deployed a React/TypeScript release portal integrating Salesforce Apex to aggregate 50+ monthly changelogs for 140K+ partners
- Authored 10 reusable React and Salesforce Lightning components adopted into a shared library across mobile and web applications
- Designed Apex unit tests covering 10+ classes and API integrations, strengthening deployment reliability

Zonda

Software Engineering Intern

Jun 2024 – Aug 2024

Austin, TX

- Constructed a housing analytics platform with Angular, Java, and the NewHomeSource API, comparing 5,000+ listings across 5+ metrics
- Optimized backend handlers to normalize housing metrics and generate location-based insights, serving queries at 100ms average latency
- Proposed and led the 2025 intern-program revamp, presenting a roadmap to 30+ executives that was adopted firm-wide

PROJECTS

Strength Atlas | Python, FastAPI, PostgreSQL

[Link to project](#)

- Built and deployed an ingestion platform crawling and normalizing coaching content into a source-linked corpus with sub-200ms search
- Indexed 337 programs and 673 claims from 133 sources, sustaining 99% crawl success through schema and URL validation
- Validated reliability through a 163-test CI suite achieving 95% coverage across APIs, authentication, search, ingestion, and inference

PeCo | Python, LangChain, ChromaDB

[Link to project](#)

- Assembled an end-to-end RAG pipeline with custom embeddings and retrieval logic, grounding an AI coach in 40+ training documents
- Configured cosine-similarity search over indexed content, delivering 90%+ retrieval accuracy against a curated evaluation set

LEADERSHIP

Texas Convergent

Technical Lead (2 semesters)

Sep 2025 – May 2026

- Launched Pinpoint, a real-time event safety platform for 100,000+ attendees with crowd heatmaps and direct EMS communication in <2s
- Programmed Nudge, a wheelchair pressure-monitoring system with a 16×16 sensor matrix, BLE firmware, and React Native app

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java, SQL, HTML/CSS

Frameworks & Platforms: React, React Native, Angular, Node.js, FastAPI, REST APIs, Salesforce, PostgreSQL, MongoDB, Supabase

Tools & Practices: GCP (Cloud Run, Cloud Storage), Git, Docker, GitHub Actions, GitLab CI, pytest, Alembic

Work Eligibility: Authorized to work in the U.S. without sponsorship
